## Premium Lifestyle Lens Package (PLP)

Multi-focal lenses allow for an extended range of vision. This package is designed to reduce your dependency on glasses most of the time for distance, intermediate and near vision. Glasses may be needed occasionally to obtain your best vision, especially at near. This package includes: Femtosecond laser assisted cataract surgery, Toric Multi-focal if needed, ORA and a LASIK/PRK touch-up if necessary.

**PLP out of pocket fee: \$6,000.00 per eye**

## Light Adjustable Lens (LAL)

Light Adjustable Lens (LAL) is the first and only FDA approved intraocular lens implant (IOL) that can be adjusted after surgery. It allows us to collaborate with you to achieve the optimized results and truly design your own visual outcomes. It offers a way to correct distance vision for patients wanting to reduce their dependence on glasses for distance. This package would also include options for patients seeking blended vision or mono vision correction. It allows the surgeon to fine-tune the patient's vision in a non-invasive manner. Your surgeon will discuss whether you are a candidate for this option. This option is not billable to your insurance.

**LAL out of pocket fee: \$6,800.00 per eye**

## Personalized Vision Package (PVP)

This package offers a way to correct distance vision for those patients who want to reduce their dependence on glasses for distance by correcting astigmatism with a limbal relaxing incision or a toric IOL. It is important to understand that glasses will be needed for intermediate and reading after your surgery. This package would also include options for patients seeking astigmatic mono-vision correction. Typically, your surgeon will only recommend astigmatic mono-vision if you've had experience with mono-vision prior to your cataract procedure. This package includes: Femtosecond laser assisted cataract surgery, Toric IOL if needed, and a LASIK/PRK touch up if necessary.

**PVP out of pocket fee: \$5,000.00 per eye**

## Standard Lens with Femtosecond laser technology

This option is for patients who want to take advantage of the newest femtosecond laser-assisted refractive lens exchange surgery as a technology add-on to the standard lens option. There will be a limbal relaxing incision to reduce astigmatism. Your surgeon will discuss whether you are a candidate for this option. Patients will typically need to update their bifocals after surgery.

**Standard Lens with laser technology out of pocket fee: \$4,000.00 per eye**

## Standard Lens

This package includes a standard lens that does not correct astigmatism, intermediate or near distances. Bi-focals or Progressives may be needed after surgery.

**Standard Lens out of pocket fee: \$3,600.00 per eye**
